4. FIRST AID MEASURES

4.1 Description of first aid measures

General Advice
First aid measures are not expected if printing filament is used as recommended. No hazards known that require special first aid measures.

Inhalation
Not likely due to physical form. Overheating or burning may release vapors or decomposition products which may be irritating. In case of inhalation of decomposition products, move to fresh air. Get medical attention if symptoms persist.

Eye contact
Unlikely to occur. Particles or dust may give mechanical irritation to the eyes. Rinse eyes with plenty of water. Get medical attention if symptoms occur.

Skin contact
Unlikely to result in first aid measures. Molten material coming from the 3D printing device may cause burns. Cool molten material adhering to the skin with plenty of water and see a physician for removal of adhering material and treatment of burn.

Ingestion
Unlikely to occur. Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed
Burns should be treated as thermal burns. The material will come off as healing occurs.

4.3 Indication of any immediate medical attention and special treatment needed

Hazards
Contact with molten substance/material may cause severe burns to skin and/or eyes

Treatment
Treat symptomatically

5. FIRE FIGHTING MEASURES

General Fire Hazards
Polymer material can accumulate static charges which may cause an electrical spark (ignition sources). Use proper bonding and/or grounding procedures if needed.

5.1 Extinguishing media

Suitable extinguishing media:
Water spray, dry-chemical, carbon dioxide

Unsuitable extinguishing media:
None known

5.2 Special hazards arising from the substance/mixture
Powdered material may form explosive dust-air mixtures

5.3 Advice for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
